

LARGE-SIZED BIG BORE HEAVY DUTY TURNING CENTER
WITH UP TO 560MM SPINDLE BORE

PUMA

1000/M

PUMA 1000 SERIES

The PUMA 1000 series machines are large horizontal turning centers, optimized for the machining of pipe and flange type parts typically found in the oil & gas, power generation, aerospace and construction and shipbuilding industries.

The machines deliver powerful machining capability and feature a two-step gearbox and high torque motors together with a rigid box guideway structure. Highly rigid servo-driven turrets ensure fast and stable tool rotation and impressive stability required for heavy-duty cutting and high accuracy milling operations.

IDEAL SPECIFICATION FOR MACHINING LARGE WORKPIECES

- The Number One choice for machining large parts and undertaking powerful cutting operations with a maximum turning diameter of $\text{Ø}1000$ mm (39.4inch), a machining length of 2,000 mm (78.7inch) and maximum spindle torque 12,040 N-m (8,885.5 ft lbs).

PROVIDING A RANGE OF PIPE MACHINING SOLUTIONS

- Maximum $\text{Ø}560$ mm ($\text{Ø}22.0$ inch) big bore spindle enables the machining of parts longer than the distance between centers.
- PUMA 1000 machines are capable of performing threading work.

IMPROVED PRODUCTIVITY

- Turret indexing is possible, even with a long boring bar ($\text{Ø}100$ x L1000 mm ($\text{Ø}3.9$ x 39.4inch)) mounted on the recently-designed high-rigidity turret that delivers improved machining stability and productivity.

BASIC STRUCTURE

A 45° slant bed with hardened and ground box guideways is made from Meehanite cast iron. The basic structure is designed to minimize deformation from occurring during heavy duty machining.

Structural stability of slant bed and box guideway

The PUMA 1000 series has been developed with years and years of accumulated engineering know-how and experience of designing and manufacturing large capacity Puma lathes behind it. PUMA 1000's rigid structure guarantees process reliability and efficient machining.

MACHINING AREA

PUMA 1000 machines are configured for machining pipes with big bores typically found in the oil and gas industry, and in sectors requiring large machined parts.

Spacious working envelope for machining large workpieces

PUMA 1000 machines' large working envelopes, big bore spindles and large swing over table enables the machining of big steel rollers, large diameter flanges, and long shafts found in ships etc.

Max. turning diameter

Ø1000 mm
ø39.4 inch

Max. turning length*

2040 mm
80.3 inch

* Max. turning length varies and depends on the chuck selected.

To enable the mounting of large workpieces using cranes, PUMA 1000 machines feature wide front doors.

Front door

SPINDLE

Powerful motors and large spindle bores $\varnothing 560$ mm ($\varnothing 22.0$ inch) enable Puma 1000 turning centers to machine shafts and valves etc., that are longer than the distance between centers.

Extra large diameter spindle through hole (bore)

PUMA 1000 machines have big spindle-through-hole capacities - up to $\varnothing 560$ ($\varnothing 22$ ")mm - and powerful spindles - up to 75kW (100.1Hp) - with two-step gearboxes that deliver unrivalled performance.

Max. spindle through hole diameter

PUMA 1000A/MA {1000B/MB}

TAILSTOCK

Highly-rigid programmable tailstocks are available as standard to provide stable support for machining long workpieces.

Programmable tailstock with built-in dead center

The tailstock, supported by hardened and ground boxed ways, comprises a one-piece structure with the machine base, ensuring high structural rigidity. Its built-in type dead center supports heavy workpieces while maintaining machining accuracy.

Quill travel /
Quill spindle diameter

150 / $\varnothing 180$ mm

Tailstock travel

1900 mm
74.8 inch

Built-in dead center MT#

TURRET

Strong, large-sized and rigidly-built servo-driven turrets ensure fast and stable tool rotation, and best-in-class process reliability for heavy-duty machining and milling operations.

Servo-driven turret

The powerful servo-driven turret provides accurate location control and quick and stable tool exchange.

The width of the turret has been doubled, compared to PUMA 600/700/800 machines, ensuring high process stability - especially required when machining long parts and during heavy-duty operations.

● Standard ● Optional X Not applicable

1) Each chuck comes with 1set of soft jaws as standard. ** Please contact DN Solutions to select detailed Twin Chucking specification.

Fire Safety Precautions

There is a high risk of fire when using non-water-soluble cutting fluids, processing flammable materials, neglecting the controlled and careful use of coolants and modifying the machine without the consent of the manufacturer. Always check the SAFETY GUIDELINES carefully before using the machine.

PERIPHERAL EQUIPMENT

Long boring bar OPTION

The long boring bar option allows customers to machine deep holes quickly and easily to minimize cycle times. Please consult DN Solutions for details.

Twin chucking OPTION

For more stable pipe threading processes, the twin chucking option (manual or pneumatic) is available. Please consult with DN Solutions for details.

Steady rest OPTION

For turning extremely long parts various types of hydraulic steady rests (Single, Double or Twin) are available.

Auto tool setter OPTION

Best practice for shaft machining, the pocket of the chuck cover accommodates the overhang of the tool, minimizing interference and enhancing tool usability.

Quick change CAPTO OPTION

The quick change tool system simplifies tool change operations. Recommended for customers who need to change tools frequently or to reduce set-up times.

Chip conveyor OPTION

Long

Short

Needle

Sludge

Hinged belt type*

Most common type of chip conveyor. Appropriate for steel materials generating chips over 30mm.

Drum filter type**

Chip conveyor with a magnet. Appropriate for machining cast iron and the generation of fine chips.

Coolant tank

DN Solutions's ergonomic roller coolant tank design allows customers to easily replace and refill coolant. Rollers on the coolant tank allows them to be taken out and put back into the machine like a drawer unit.

Coolant Chiller (recommended) OPTION

A coolant chiller is recommended to help prevent temperature rises and to reduce thermal deformation when using a water-insoluble coolant or a high-pressure coolant system (i.e., power over 1.5kW).

DN SOLUTIONS FANUC i PLUS

DN Solutions Fanuc i Plus maximizes customer productivity and convenience.

15" Screen + New OP

DN Solutions Fanuc i Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

DN Solutions Fanuc i Plus

- 15-inch color display
- Intuitive and user-friendly design

USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonomic operator panel
- 2MB Memory
- Hot keys

iHMI touchscreen OPTION

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

SKETCH-TURN OPTION

DN Solutions Conversational programming software for PC

- Easy to learn for beginners
- Time savings in programming
- Reduce processing cycle time

STABLE THREADING PERFORMANCE

2-axis* through to Y-axis models are capable of threading work.

* In order to re-machine threads or perform arbitrary speed threading on a 2-axis machine, additional options/accessories have to be selected.

Threading repair function

This standard Fanuc NC function allows users to repair threads even when the original program is no longer available or cannot be accessed available.

Arbitrary speed threading

OPTION

This function allows users to control and override spindle speeds in order to produce/replicate the best thread quality.

Re-machining function

This function is included within the arbitrary speed threading software and enables customers to re-machine damaged threads using existing programs.

* Bar working diameter is a nominal size(PUMA 1000A : 375mm / PUMA 1000B: 555mm) we can expect when doing the double chucking operation at both sides of the headstock and using spindle through hole.

* {} : Option

The DN Solutions promise, MACHINE GREATNESS, has two important meanings. The first is simple: DN Solutions makes great machines. The second is a challenge to our end-users. With a product line that is this comprehensive, accurate and reliable, we equip our customers to machine greatness. **The big question: *Why should you choose DN Solutions over other options?***

Here's why...

**MACHINE
GREATNESS™**

WHAT YOU MAKE AND HOW YOU MAKE IT MATTERS—SO MAKE IT
GREAT WITH DN SOLUTIONS.

UNBEATABLE MACHINES

You won't find a more comprehensive range or a better combination of value, performance and reliability anywhere else.

ROBUST PRODUCT LINE

We offer an impressive range of machine models and hundreds of configurations. Whatever your machining needs and requirements, there's a DN Solutions for you.

READILY AVAILABLE - ANYWHERE IN THE WORLD

Machining centres (including 5-axis machines), lathes, multi-tasking turning centres and mill-turn machines, and horizontal borers with best-in-class specifications are all available...ready to install.

EXPERT SERVICE

Our dedicated, experienced and knowledgeable team is totally committed to improving your productivity, growth and success.

CUSTOMER SUPPORT AND SERVICES

We're there for you whenever you need us.

We help our customers operate at maximum efficiency by providing them with a range of tried, tested and trusted services - from pre-sales consultancy to post-sales support.

FIELD SERVICES

- On-site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair service

PARTS SUPPLY

- Supplying a wide range of original DN Solutions spare parts
- Parts repair service

TRAINING

- Programming, machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering

TECHNICAL SUPPORT

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy

RESPONDING TO CUSTOMERS ANYTIME, ANYWHERE

DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.
